### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The prior art does not teach the claimed composite squirrel cage rotor including, inter alia, an inner core having high magnetic permeability disposed between the rotor shaft and the rotor polymer resin body. Yamada teaches a laminated core 15, but it is not disposed between a shaft and a polymer resin body but between shaft 5 and a sheet of plastic magnetic material 11 (Fig. 2). Yamada's invention is directed to the use of the plastic magnetic sheet material 11 to improve anisotropy (c.2, lines 53-60) and efficiency (c.4, lines 9-38). There is no discussion in Yamada regarding benefits of the core 15 which would lead one to combine such a core with the admitted prior art to form an "inner core" between the admitted prior art's shaft 21 and resin body core 22. Indeed, Yamada's core 15 functions in the same manner as the admitted prior art resin body "core" 22 which includes iron powder. There is no suggestion to form an "inner", secondary core.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
